Re: KSDT (AM), Hemet, California
Facility Identification Number: 36830
RuDex Broadcasting Limited Corp.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed June 8, 2010, on behalf of RuDex Broadcasting Limited Corp. (RuDex). RuDex requests further extension of the special temporary authority (STA) originally granted on August 12, 2004, to operate Station KSDT from a site other than the licensed site.¹ In support of the request, RuDex states that its efforts to locate a new site for the station have been frustrated by the local zoning process. RuDex states that its pending Application BMJP-20040129AQL was dismissed by the staff on April 15, 2010, and that it has filed a new application to relocate the station to Loma Linda, California.²

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

¹ KSDT is licensed for operation on 1320 kHz with 0.5 kilowatt daytime and 0.3 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

² File No. BP-20100608ADF.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KSDT may continue to operate with the following facilities:

Coordinates:	33° 44' 44.5" NL. 116° 59' 58.5" WL (NAD 1927)
Frequency:	1320 kHz
Operating hours:	Unlimited
Operating power:	0.05 kW (50 watts)
Antenna:	temporary, roof-mounted whip
Overall height	38 feet AGL

It will be necessary to further reduce power or cease operation if complaints of interference are received. RuDex must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 9, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".
